

**University of Pittsburgh
School of Medicine**

The Fourth Annual A. Julio Martinez Memorial Lecture

GUEST SPEAKER

Gregory N. Fuller, MD, PhD
Professor of Pathology
Chief, Section of Neuropathology
The University of Texas
MD Anderson Cancer Center
Houston, TX

“One Decade of Glioma Genomics Research: What Have We Learned?”

Wednesday, December 3, 2008

12:00 – 1:00 p.m.
Lecture Room 3, Scaife Hall
University of Pittsburgh
School of Medicine
Pittsburgh, PA

Dr. Fuller earned his PhD degree in Neurochemistry at The University of Texas Graduate School of Biomedical Sciences in the Texas Medical Center under the supervision of Richard C. Wiggins and received his MD degree from Baylor College of Medicine. He completed his internship and residency at Duke University, followed by a neuropathology fellowship at Duke under the direction of Peter C. Burger and F. Stephen Vogel.

Dr. Fuller joined the faculty of M.D. Anderson Cancer Center in 1992, where he is currently Professor of Pathology and Chief of the Section of Neuropathology. He also directs the Automated Image Acquisition and Tissue Microarray Core Laboratories. Dr. Fuller is actively engaged in patient care as Chief of Neuropathology and has an active research program centered on brain tumor pathobiology and the molecular classification of gliomas, for which he

received the Lucian J. Rubinstein Award from the American Association of Neuropathologists in 2000.

Dr. Fuller sits on the editorial boards of eight scientific journals and most recently served as a member of the Working Group for the 4th edition of the *World Health Organization Classification of Tumours of the Central Nervous System*. Dr. Fuller has published over 190 peer-reviewed research papers and 40 book chapters, and has co-authored two textbooks: *Practical Review of Neuropathology* with J. Clay Goodman, and *Genomic and Molecular Neuro-Oncology* with Wei Zhang.
