Charlestown, Massachusetts

*"Revisiting the Mechanisms of Alzheimer's Progression"*

**Wednesday, January 22, 2014**

12:00 – 1:00 p.m.

Room 1104

UPMC Presbyterian Hospital  
11<sup>th</sup> Floor Scaife Conference Center  
200 Lothrop Street,  
Pittsburgh, PA

Brad Hyman received his MD and PhD (Biochemistry) from the University of Iowa, then did a preresidency year in neuroanatomy with Gary Van Hoesen, completed his neurology residency, and took a year as a "guest" neuropathologist with Mike Hart before moving to Massachusetts General Hospital and Harvard Medical School in 1989 as an Assistant Professor of Neurology. He is now the John B Penney Professor of Neurology at Harvard, directs the Massachusetts Alzheimer Disease Research Center at MGH, and remains active clinically seeing patients with neurodegenerative diseases as well as in laboratory studies of dementias. He has won numerous awards and honors, including the Potamkin Prize and the Metropolitan Life Prize (twice) for his contributions in experimental neuropathology.
