ANN ARBOR, MICHIGAN (USA). The Department of Pathology at the University of Michigan Health System is seeking a physician scientist with subspecialty training and certification in neuropathology. Our active neuropathology service accesses over 1,200 cases annually and comprises about 700 surgical specimens, over 200 consultation cases, and 350 to 400 nerve and muscle biopsies. An active autopsy and forensics service provides opportunities to examine over 200 brains annually. Our Neuropathology Fellowship was recently accredited for one fellow annually.

The successful candidate will have a clearly defined laboratory project and a track record of academic accomplishment including extramural funding and peer-reviewed publications. Preference will be given to candidates whose research interests are aligned with the University of Michigan Health System strategic plan identifying neuroscience as an area in which to build on our strengths and expertise. Excellent diagnostic and communication skills, board certification in Anatomic Pathology and Neuropathology, and a commitment to service excellence are required. The successful candidate will be given significant protected time to develop his or her research program.

The Department of Pathology at the University of Michigan comprises over 150 faculty members with extramural research support totalling over $30 million dollars in FY2012. State-of-the-art research laboratories, a large community of investigators committed to team science, and a diverse, world-class medical center contribute to a nurturing and supportive environment for physician scientists. Ann Arbor offers a quality of life and amenities found in few other comparably sized communities. In 2011 alone, Ann Arbor was ranked #2 on U.S. News and World Report’s list of the 10 Most Educated Cities, #6 on Forbes Magazine’s list of the 25 Best Cities for retirement, and #1 on Bizjournals.com’s list of the Smartest Big Cities.

Appointment will be at the level of Assistant Professor, Associate Professor, or Professor (tenure track), commensurate with the candidate’s level of experience, accomplishments, and sustainable funding.

Interested candidates should submit a curriculum vitae along with the names and addresses of three to five references to:

Andrew P. Lieberman, M.D. Ph.D.
Director of Neuropathology
