STANFORD UNIVERSITY MEDICAL CENTER
NEUROPATHOLOGIST

The Department of Pathology at Stanford University School of Medicine seeks an academic Neuropathologist for appointment at the rank of Assistant or Associate Professor in the Medical Center Line. The major criteria for appointment for faculty in the Medical Center Line shall be excellence in the overall mix of clinical care, clinical teaching, and scholarly activity that advances clinical medicine, and institutional service—appropriate to the programmatic need the individual is expected to fulfill.

Neuropathology handles each year approximately 800 neurosurgical specimens from Stanford University Medical Center (SUMC), and an additional 600 consultation specimens from outside of SUMC, including over 300 muscle biopsies from SUMC and non-SUMC patients; the service also is responsible for approximately 250 brain examinations annually. Duties will include significant sign-out responsibilities in surgical and autopsy neuropathology, including frozen section analysis. The successful candidate also will contribute to the expansion of our diagnostic services in neuropathology to those outside of SUMC, through our consult service. Candidates must hold an M.D. or an M.D., Ph.D. and board certification in anatomic pathology and neuropathology, and are required to hold or to be eligible for a current license to practice medicine in the State of California.

The successful candidate will be expected to lead and/or contribute to clinical, translational and/or basic research projects and to participate in training clinical residents and fellows. Departmental support is available for suitable research projects by Medical Center Line faculty.

Applicants should submit curriculum vitae, as well as a brief description of research accomplishments and plans for future research. These, with the names of three references, should be sent to:

Stephen J. Galli, M.D.
Professor and Chair
c/o Ms. Cynthia L. Llanes
